Description

TA572 is an industry standard thermowell, manufactured from round bar stock.

The process connection is socket weld.

The thermowell stem shape can be straight, conical or conical tapered.

The extension, the immersion and the tapering lengths as well as the bar dimensions can be chosen according to process requirements.

A wide choice of standard materials is available; other versions can be ordered according to specification.

Different grades of surface finishing are also available.

Application

TA572 is designed for use with resistance and thermocouple thermometers mainly in heavy duty applications.
